Presenter: Donald Garrett Topic: Q4 2019 & Q1 2020 Data Review	Review Q3 2019 D2N time as it does not add up to 100. IV TPA Administration and IV TPA administration with transport were broken out because we wanted to see how many hospitals were giving TPA at an outside facility and transferring them versus how many were getting at the hospital. CEO reports show hospital treatment rates. Will change label to "TPA administration at outside facility the pt. transfer". Return to baseline is based on physician documentation of improvement. Will confirm how many facilities constitute the 2% of unknown arrival patients. For Q1 2020 data, the graph notes 30 of 32 designated Stroke Centers but we had another designated this year. We are now at 33. Noted big drop between Q3 and Q4 due to adding return to baseline category. Even if the stroke diagnosis is a secondary discharge diagnosis, it should be entered into quintiles. SETRAC requesting stroke and STEMI data for April and May 2020 as soon as possible.	The committee has no further recommendations
Open Discussion	Darrell Pile noted a recent publication on stroke and patients delaying their care. Stroke numbers may be low due to patients falling under COVID-19 diagnosis. Concerns noted regarding documentation delays and delays due to donning of PPE.	The committee has no further recommendations
