

## SMART GOAL

- **Specific** – Decrease percentage of NICU infants receiving antibiotics in the first week of life more than 1h after order/birth (if order placed prior to birth) to 25%
- **Measurable** – Collect quarterly data from participating SETRAC NICU programs
- **Attainable** – Utilize project meetings to discuss program strengths and struggles, ultimately creating additional resources within the antibiotic toolkit to assist individual programs to improve antibiotic timeliness.
- **Relevant** – Improvements in antibiotic timeliness within the NICU supports the goals of SETRAC to improve overall health of Mothers and Babies in RAC Q.
- **Time** – By December 2025
