Ebola Update

(continued)

- What is a PUM?

An individual undergoing monitoring by public health officials is considered a Person Under Monitoring (PUM). The PUMs in this Ebola outbreak are individuals who have **potentially been exposed to the Bundibugyo virus or have recently traveled to countries affected by the current Bundibugyo virus disease outbreak** as identified by the United States Department of Health and Human Services.

Monitoring persons with potential exposure to Bundibugyo virus for symptoms of BVD helps ensure that an individual who becomes ill is identified as soon as possible after symptom onset, so that he or she can be rapidly isolated and evaluated.

Currently, these definitions and risk categories only apply to travelers from the Democratic Republic of Congo (DRC), South Sudan, and Uganda. As this is an ongoing and evolving outbreak, the definitions and risk categories are subject to change.

Affected countries refers to those countries currently affected by the outbreak of BVD.

MISSING PERSONS REPORT

- As FIFA is heating up, we want to provide a very straightforward and easy process to report missing persons should someone arrive at your facility looking for a sick or injured person. (Related to the FIFA World Cup)
- We are providing access to a form that is available in multiple languages to assist with reporting a missing person. NOTE, this is meant to be utilized if the missing person is presumed to be part of the FIFA event, as either a participant or a fan.
- The steps to follow if someone comes to your facility looking for a missing person are:
 1. Determine if the missing person is at your facility and follow your normal process for reunification if they are located at your facility.
 2. IF they are not at your facility, utilize the missing persons form found at this URL
- [SETRAC FIFA missing persons](#)

Or this QR Code can be provided for ease of access on a mobile device. The reporting party can leverage this QR Code if necessary as it can be changed to multiple languages and allows for uploading pictures of the missing person etc.
