We are providing access to a form that is available in multiple languages to assist with reporting a missing person.

NOTE: This is meant to be utilized if the missing person is presumed to be part of the FIFA event, as either a participant or a fan.

Steps to follow if someone comes to your facility looking for a missing person:

1. Determine if the missing person is at your facility and follow your normal process for reunification if they are located at your facility.
2. If they are not at your facility, utilize the missing persons form found at this URL.

Small facts can lead to **big insights.**

Invented in 1818 by English engineer Sir William Cubitt, the treadmill was initially designed as a torture and reform device for inmates in British prisons. Instead of a moving belt, the first machines were large paddle wheels with steps. Prisoners were forced to hold onto a rail and continuously climb for up to 10 hours a day. These penal treadmills were eventually banned in the late 19th century due to their excessive cruelty.

The concept didn't return until the 1950s when cardiologist Dr. Robert Bruce and researcher Wayne Quinton at the University of Washington repurposed the motorized treadmill to diagnose heart disease. This gave birth to the famous Bruce Protocol cardiac stress test, which eventually paved the way for the home and commercial exercise treadmills we use today.
